DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 24-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 24 teaches that the polyol is alkyl glucoside, but teaches an amount of sorbitol. The scope of the claim is thus not clear. Dependent claims fall herewith.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-23 and 27-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Card (5877127).

Card teaches a method of fracturing a subterranean formation in which an aqueous fluid gelled with a polysaccharide, and containing a polyol within the scope of the present invention is used (see the examples, Tables 1, 2 and 3 and column 11, lines

Art Unit: 1712

18-62). As in the present invention, heat and pH control agents are used (column 11, lines 62-65 and column 9, lines 16-35). Applicants discovery of the inherent property of the polyol acting as a breaker does not distinguish over the prior art (In re Tomlinsin 150 USPQ 623).

3. Claims 37-46 are allowable over the art of record.

4. Applicants arguments have been considered but are not deemed fully persuasive. Claim 24 still contains a reference to sorbitol in line2, and is thus still rejected. With respect to Harms the rejection is removed, since such teaches an oxidative breaker. With respect to Card, most of applicants arguments are done in regard to obviousness. In the instant case an anticipation rejection is made. Since Card places the composition, comprising the same polyol in the formation, under the same conditions, it is not seen absent a showing by applicant how such could produce a different result. Again applicant's discovery of the inherent property of the polyol acting as a breaker does not distinguish over the prior art (In re Tomlinsin 150 USPQ 623). It is established case law that when materials are reacted in the same manner as in a reference, then the same result must be produced (In re Fitzgerald 205 USPQ 594. The polyol must break down the polymer, absent a showing to the contrary.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
